

ALM Rectangular with radius, 4x hole

Product information

- Triple-layer material (aluminum-plastic-aluminum)
- Black plastic inner layer
- Outer layer in silver or gold
- Available with self-adhesive foil / adhesive foil
- Thickness: 1.5 mm
- Inscription technique: Engraving

ALUMATT products are high pressure decorative laminated sheets, preferably in plain colors. In contrast to standard laminates, Alumatt has a three-layer symmetrical structure of melamine resin impregnated cellulose sheeting. The color of all layers is exactly defined. The colors of both outer layers are usually in stark contrast to the core color. This color contrast makes the engraving very readable. For engraving, the outer layers are kept very thin. The layer thickness is approximately 0.08 mm. The plain papers are homogeneously colored in the mass. The color connection is secured with these paper qualities. The base is free of heavy metals and has a high level of light stability.

Material properties

Alumatt (ALM) |

Adhesive properties

467 SK adhesive film with adhesive

ALM Rectangular with radius, 4x hole

Thermal properties

Temperature / temperature range -40 °C – 80 °C

Fire properties

Fire classification B2

General technical data

Single-line and multi-line labelling

Assembly method

Adhesive system

Screw system

Labelling technology

Engraving
