

TEA polyester label

Product information

The TEA (Thermotransfer-Label-Automotive) series of labels has been specially developed for the automotive industry in order to offer an efficient and customer-optimized solution. They meet current requirements.

Polyester 50 µm film comes with a slight gloss and a surface coating to ensure outstanding color fixing when inscribing with thermal transfer print systems and synthetic resin-based thermal transfer ribbons. The smooth surface of the material enables full-cover color transfer, ensuring precise lettering. The polyester labels are suitable for adhesion to metal, gloss paints and high surface energy plastics. The permanent acrylate adhesive exhibits high initial adhesion and at least 1006 N/m FTM1 on steel after 72 hours. The silver polyester labels are UL-certified for thermal transfer printing using our resin ribbons.

- TEA Polyester labels are suitable for
- Device identification in areas protected from the weather
- Components with smooth surfaces
- Components without curves or corners

Suitable for thermal transfer printersofmp-TM Serie and pavon is (with external unwinder).
